Resonance Video

Go to the MRC (Media Resources Center, now part of E.T.C.) in the basement of the library and ask to see the video tape VH 2630 E “Mechanical Universe: Resonance”. The “Resonance” program is the first half of the tape and lasts about 25 minutes. This assignment will count 4 times as much as any one other “assignment.”

1. What did you think was the most interesting part of the video tape?

2. What did you learn the most about from the tape?

3. What part of the video tape did you find least helpful/most confusing?

4. Define resonance as clearly as you can.
