

NEUROSCIENCE PIPELINE PROGRAM

Undergraduate summer research experience

The Washington University in St. Louis Neuroscience Pipeline program prepares undergraduates from diverse backgrounds for neuroscience PhD programs. We combine outstanding research training, a rigorous curriculum and an empowering support system that allows participants to thrive on their path to graduate school and beyond. With support from the NIH BP-ENDURE Program and Washington University, accepted students are funded for up to **two** summers. Overall, the program embeds students in a network of neuroscientists and enhances trainee success.

PROGRAM DATES

May 28, 2019 - August 3, 2019

APPLICATIONS DUE

February 1, 2019

APPLY

endure.wustl.edu

BENEFITS

- Up to two summers of cutting-edge research.
- \$5000 stipend per summer.
- Free housing and travel to and from the program.
- Academic and professional development workshops.
- GRE (or MCAT) prep course.
- Attend up to two scientific conferences annually.
- Individualized advising and mentoring.

ELIGIBILITY

A strong candidate is:

- Interested in research and pursuing a PhD or MD/PhD in a neuroscience-related field.
- Enrolled full-time in a baccalaureate degree program.
- A US citizen or permanent resident.
- From an underrepresented group (e.g. racial or ethnic minorities, students with disabilities, from low income households and first-generation college students).
